Staticide™

General Purpose Staticide® Outperforms! For Non-Porous Surfaces

Staticide is non-toxic, nonflammable, non-staining, completely biodegradable and safe to use. It's the key component in any total environmental static control program.

When properly applied, Staticide complies with or exceeds all electrostatic decay criteria established for antistatic performance as set forth by NFPA and MIL B-81705B, when tested in accordance with Federal Test Standard 101B Method 4046.

Solves static-related problems such as:

- The attraction of dirt, dust and bacteria to all environmental surfaces, products and product packaging
 - Charge generation on surfaces of tote boxes and carriers used to process and store electronic components
 - Damage or destruction of sensitive electronic components and subassemblies during their manufacture, shipping or receiving
 - Data processing "glitches"... memory loss, data errors, paper jams
- General Purpose Staticide is packaged in ready-to-use quart bottles with trigger sprayers or in easy-to-pour gallon containers.

Please call DME for available in bulk quantities.

ACL2001

STATICIDE

Static Charge Measuring Device

Measures Static Charge Instantly, Reliably and Economically!

- Measures static charges from zero to 30,000 volts
- Convenient pocket size
- Designed for close-in repetitive readings
- Uses standard 9 volt battery
- Battery test feature
- Low drift
- Repeatability ± 1%, accuracy ± 10%
- One-year warranty on parts and labor

Features a unique "quick zero" function which instantly zeroes the instrument and provides ground compensation for the user. Size: 4-3/8" x 2-5/8" x 1-5/16"

Static Charge Measuring Device - Part Number ACL300B
Protective Carrying Case - Part Number ACLCS13

STATIC CHARGE MEASURING DEVICE

Digital Static Charge Meter

ESD Digital Static Meter

Industrial Digital Electrostatic Meter

Accurate, sensitive and responsive, the Model 7905 Digital Static Charge Meter allows easy one-hand static measurements. It indicates the surface voltage and polarity on objects up to ± 20 kV at a spacing of one inch (25mm). The Digital Static Meter features a push button "hold" for readings and automatic "power off."

Designed for use by industrial, maintenance, electrical and other field personnel, the 7905 has a rugged, hard shell plastic case and a compact design. With low drift and trouble-free operation, maintenance consists of periodic replacement of its 9 volt battery.

The 7905's digital readout instantly indicates the magnitude and polarity of any static charge. It's easy to locate and monitor potential trouble spots, position static elimination equipment, and evaluate the effectiveness of existing systems.

Part Number #7905 (unit includes rugged hard shell carrying case and battery)

Specifications

Range: 0 to ± 20 kV at 1"

Power: (1) 9 volt battery (Eveready 216)

Distance: The meter reads true at 1" from thick the test surface

Size: 4.14" (10.6cm) long, 2.4" (6.1cm) wide, 1" (2.5cm)

Color: black

Accuracy: $\pm 10\%$ of full scale (113 grams)

Weight: Approximately $\frac{1}{4}$ pound

DIGITAL STATIC CHARGE METER

Cold Air Gun

F

Replace messy mist systems - improve dry machining with clean, cold air! Clean, cold air at 50°F below supply air temperature, with no moving parts!

Features

- Low cost
- Compact
- No moving parts
- Maintenance-free
- Quiet
- Magnetic base

Use For

- Cooling parts
- Cooling core pins
- Setting hot melts
- Minimize heat sinks
- Stop drooling or freeze-off a nozzle

COLD AIR GUN

How the Cold Gun Works:

The Cold Gun Air Coolant System incorporates a vortex tube to convert an ordinary supply of compressed air into two low pressure streams: one hot and one cold. The hot air stream is muffled and discharged through the hot air exhaust. The cold air is muffled and discharged through the flexible hose, which directs it to the point of use. The magnetic base provide easy mounting and portability.

Ordering Information

Cold Gun Kits include: Cold Gun with magnetic base, pneumatic filter with manual drain, single or double point flexible hose kit.

Super Air Wipes

Blow off, dry, clean and cool pipe, cable, extruded shapes and hose!

Split design requires no threading!

EXAIR's Super Air Wipe provides a uniform 360° airstream that is ideal for blowoff, drying, cleaning and cooling of pipe, cable, extruded shapes, hose and more. The split design offers easy clamping around the surface of the material moving through it, eliminating the need for threading. All models include stainless steel screws and shims. Stainless steel wire braided hose is also included on sizes up to 4" (102mm) for added corrosion and heat resistance. Aluminum models are rated for temperatures up to 400°F (204°C) and stainless steel models for temperatures up to 800°F (427°C).

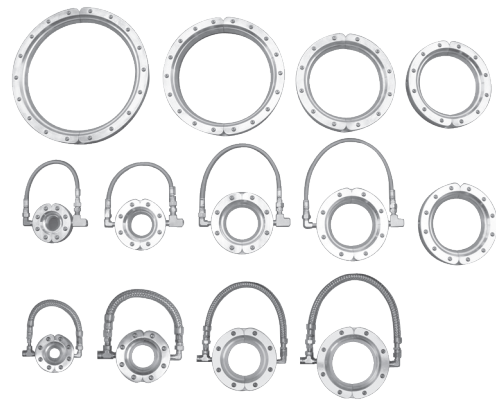

SUPER AIR WIPES

Air Wipe Performance			
80 PSIG (5.5 BAR)	Air Consumption		Sound Level @ 3' (.91m)
Model	SCFM	SLPM	dBA
2401, 2401SS	19.1	541	76
2402, 2402SS	29.5	835	77
2403, 2403SS	39.8	1127	79
2404, 2404SS	50.2	1422	81
2405	60.6	1716	82
2406	71.0	2010	84
2407	81.3	2302	85
2409	102.1	2891	87
2411	122.8	3477	89

Advantages

- Quiet
- Low air consumption
- Uniform airflow across the entire diameter
- Stainless steel hardware resists corrosion
- Aluminum models for temperatures up to 400°F (204°C); stainless steel models for temperatures to 800°F (427°C)
- Stainless steel hose supplied on sizes up to 4" (102mm)
- No electricity, no moving parts
- Non-contact - no wiper blade
- Split design - compact, rugged, easy to install
- Lightweight, low profile
- Tapped holes for mounting
- Variable force and flow
- Meets OSHA maximum dead-end pressure and noise requirements

The Aluminum Super Air Wipe is available in 9 sizes from stock. The Stainless Steel Super Air Wipe is available in 4 sizes from stock. Other sizes are available by special order.

Applications

- Drying after wash, cleaning, plating or coating
- Blow off dust and contaminants
- Cool hot extruded shapes
- Uniformly wipe surfaces
- Eliminate solution carryover - no cross contamination
- Remove excess coatings, water and oil
- Minimize solution loss due to drag-out
- Dry screen printed and ink jet surfaces
- Ideal for pipe, cable, extrusions, wire, rod and hose

SUPER AIR WIPES

How The Air Wipe Works

Compressed air flows through an inlet (1) of the Air Wipe into an annular chamber (2). It is then throttled through a small ring nozzle (3) at high velocity. This primary airstream adheres to the Coanda effect (4), which directs it down the angled surface of the Air Wipe. A low pressure area is created at the center (5) inducing a high volume flow of surrounding air into the primary airstream. As the airflow leaves the Air Wipe, it creates a conical 360° ring of air that attaches itself to the surface of the material running through it (6), uniformly wiping the entire surface with the high velocity airflow.

Super Air Wipe Systems

Super Air Wipe	
Model Number	Description
2401	1" (25mm)
2402	2" (51mm)
2403	3" (76mm)
2404	4" (102mm)
2405	5" (127mm)
2406	6" (152mm)
2407	7" (178mm)
2409	9" (229mm)
2411	11" (279mm)

Super Air Wipe Kit	
<i>Kit includes Super Air Wipe, filter separator, pressure regulator and shim set</i>	
Model Number	Description
2451	1" (25mm)
2452	2" (51mm)
2453	3" (76mm)
2454	4" (102mm)
2455	5" (127mm)
2456	6" (152mm)
2457	7" (178mm)
2459	9" (229mm)
2461	11" (279mm)

Super Air Wipe Is Easy To Use

There is a 1/4" NPT female inlet on each half of the Super Air Wipe on sizes up to 7" (178mm). Larger sizes include two 1/4" NPT female inlets on each half in order to maintain proper air volume and performance. Aluminum Super Air Wipes up to 4" (102mm) include a brass tee that supplies one half directly and a stainless steel wire braided coupling hose rated at 400°F (204°C) to supply the other half. Stainless steel Super Air Wipes up to 4" (102mm) include a stainless steel tee and a stainless steel wire braided coupling hose rated at 800°F (427°C). Larger sizes should be piped directly.

The Model 2402 2" (51mm) Super Air Wipe cools PVC pipe as it is ejected from an extruder.

Mica Insulated Heater Band

Time-tested materials & manufacturing techniques make this heater a proven, economical, reliable performer. In applications where a flat surface requires uniform heating, this heater has no equal.

Material List

- 1) Stainless steel post terminals are supplied with nuts and washers. Connections are attached to the oversized terminal head for superior electrical contact. Many other terminations and leads available.
- 2) Stainless steel welded on clamps have precision drilled and tapped barrel nuts and are supplied with high torque 10–32 socket head cap screws. These are used for firm clamping and excellent heat transfer.
- 3) The two-piece sheath is composed of a rust-resistant, matte finish, zinc-coated bottom plate and galvanized top plate. This construction provides excellent heat emissivity and corrosion resistance.
- 4) Mica provides complete electrical insulation of the heater case from the steel case, while providing maximum heat transfer.
- 5) Flat nickel-alloy ribbon wire provides the highest heating area possible. Each heater is engineered for wire size and pitch to provide the highest efficiency, while minimizing winding temperature.

MICA HEATER BAND

Maximum Recommended Watts

When heating objects to higher temperatures, lower watt density heater bands should be used. This will help to prevent overheating and provide a longer heater band life.

Watt density is the total wattage of the heater band divided by the heated surface area of the heater band. Use this table below to help determine the recommended watt density for the application. Lower watt densities can be achieved by operating a 240 volt heater band on 120 volts. In doing this the wattage and watt density are derated by a factor of 4.

- One piece and 2-piece bands
- Fiberglass leads, stainless leads and post terminals
- 120 and 240 volt styles
- Uniform heat, high watt density
- Many wattage options
- High-quality sheet mica construction
- Many sizes in stock ready to ship
- Custom bands available in rush and standard delivery option

Operating Temp.	Maximum Recommended Watts Per Sq. In.
300°F (149°C)	40
400°F (204°C)	30
500°F (260°C)	21
600°F (316°C)	12
700°F (371°C)	10
800°F (427°C)	10
900°F (482°C)	10

Metric Heater Bands

- Low cost, quality bands
- For other sizes, please see Standard Mica Heater Band pages that follow
- 12" stainless steel leads

Heat Transfer Compound

HEAT TRANSFER COMPOUND

- Transfers heat away from electronic devices
- High thermal conductivity
- Temperature range to 400°F

Highly effective when used with rectifiers, ignition control modules, voltage regulators and other heat generating electronic devices.

Part Number 49643 - 5 oz. tube

Nozzle Bands

- Low cost, quality bands
- For other sizes, please see Standard Mica Heater Band pages that follow

Mica Heater Bands

With Flange Lock-up

Heavy-Duty Nozzle Bands with Flange Lock-up

Far superior to low cost alternatives, these bands provide the most economical option for the long term.

- Premium quality natural mica insulation
- Reinforced lead exit for long life
- High watt density
- Ultra-smooth I.D. bore - reduces hot spots

Dual voltage bands (120/240V) can be configured for either voltage

- For 240V, use two red wires as power leads; white wire is not used (insulate with tape)
- For 120V, connect 2 red wires and use as on power lead; use red wire as second lead

Mix and match sizes for maximum discount.

MICA HEATER BANDS

Heavy-Duty Nozzle Bands with Flange Lock-up

Far superior to low-cost alternatives, these bands provide the most economical option for the long term.

- Premium quality natural mica insulation
- Reinforced lead exit for long life
- High watt density
- Ultra-smooth I.D. bore - reduces hot spots

Dual voltage bands (120/240V) can be configured for either voltage

- For 240V, use two red wires as power leads; white wire is not used (insulate with tape)
- For 120V, connect 2 red wires and use as on power lead; use red wire as second lead

MICA HEATER BANDS

Wedge-Lock Heater Bands

Where Heater Band Clearance is Problematic! Ideal for Recessed Sprues.

Applications: Use where recessed sprue bushings and similar obstructions create limited space for nozzle heater bands. These bands require only $\frac{3}{8}$ " to $\frac{1}{2}$ " diameter clearance. ($\frac{3}{16}$ " to $\frac{1}{4}$ " on a side.)

Example: Using nozzle with $1\frac{1}{2}$ " body diameter plus Wedge-Lock band, the clearance required is only 2" or less.

This band is frequently used in place of regular nozzle bands due to ease of installation and removal.

14" Flexible Fiberglass

Covered Leads

To install, simply slide band over nozzle, then tap tapered key. Band will automatically tighten to snug fit.

To remove, simply tap tapered key in opposite direction, then pull off band.

Wedge type tapered key locking device requires only $\frac{3}{8}$ " to $\frac{1}{2}$ " clearance on diameter.

Order Your Custom Bands Today!

Standard delivery for non-stock items is 2 - 3 weeks

Rush delivery in 2 - 3 days add 25%

Design Features

- Energy-efficient, less power consumption
- High sheath temperature capability up to 1600°F
- Thermally insulated
- Uniform temperature
- Flexible, easy to install and remove

Terminal Box Cover

Heavy gauge, rust-resistant material has knockouts for ½" conduit connections.

Ceramic Fiber Insulation

The standard insulation is ¼" thick to improve energy conservation 25% or more than non-insulated bands (½" thick insulation optional). In the Maxi-Insulated design, an additional ½" non-compressed layer of insulation is contained in a separate, flexible chamber for even greater energy savings.

Serrated Sheath

Sheath material is resistant to heat and corrosion. Unique serrations maximize flexibility, increase surface contact and provide easy opening and installation of the heater, eliminating the necessity of two-piece band heaters up to 18" in diameter.

Simplified Installation, Additional Energy Conservation

Ceramic Band Heaters can be manufactured in widths much greater than what is practical in Mica Band Heaters, eliminating heat losses between gaps in narrow band heaters and simplifying installation.

Mounting Flange Included Standard

Quick-release latch is optional for ease of installation. Spring-loaded screw on flange is available to compensate for thermal expansion and contraction (over 18" diameter).

Termination

Located at gap or 180° from the gap.

Thermocouple

Should be located through gap or through hole in overlap flange where possible. Contact DME about holes and cut-outs through sheath.

Each band expands over ½"!

CERAMIC HEATER BANDS

A very versatile band - keep them in stock!

Mineral Insulated Heater Bands

Designed for Modern High-Temperature Molding Operations

Two fiberglass-insulated lead wires exit in a single metal braid for good abrasion protection, lead flexibility and wiring convenience. Leads are 2" longer than braid. Standard length is 12". Specify if longer leads are required.

**MINERAL INSULATED
HEATER BAND**

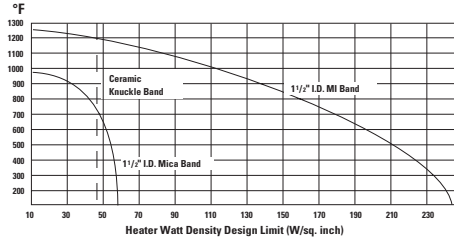

When ordering, specify lead length and terminal location. 12" length leads are standard. For special wattages, voltages or other requirements, please contact DME.

Mineral Insulated Heater Bands

Up to 1400°F and 230 Watts/in. sq.

For today's high melt-temperature engineering materials. Mica bands cannot operate safely above 900°F which makes them inadequate for high-heat engineering materials such as PTFE Ultem, Zytel & Peak. Mineral insulated bands are the solution, capable of continued operating temperatures as high as 1400°F. Also, high thermal conductivity mineral insulation and uniform element construction provide extended life. Optional Ceramic Terminal Covers CTC0124 ordered separately. Includes post terminals, welded on barrel nut hinge, plus clamp.

Operating Temperatures up to 1400°F

Very high-watt density for use in high-heat applications.

MINERAL INSULATED HEATER BAND

Custom Strip Heaters

Time-tested materials & manufacturing techniques make the Custom Strip Heater a proven, economical, reliable performer. In applications where a flat surface requires uniform heating, the strip heater has no equal.

Material List

- 1) Mica provides complete electrical insulation of the heater case from the steel case, while providing maximum heat transfer.
- 2) Flat nickel-alloy ribbon wire provides the highest heating area possible. Each heater is engineered for wire size and pitch to provide the highest efficiency, while minimizing winding temperature.
- 3) The two-piece sheath is composed of a rust-resistant, matte finish, zinc-coated bottom plate and a polished stainless steel top plate. The highly reflective properties of the stainless steel send maximum heat to the working surface. This construction provides excellent heat emissivity and corrosion resistance.
- 4) Stainless steel post terminals are supplied with nuts and washers. Other terminations are available; see below.

Standard Post Terminal Options

FO-A

Post Terminals - one on each end; minimum width 3/4"

FO-C

Post Terminals - tandem (inline); minimum width 3/4"

FO-B

Post Terminals - parallel (side by side); minimum width 3/4"

Optional Terminations

Dual-A-Dual Volt 3PH-A-3 Phase

common

Dual-C-Dual Volt 3PH-C-3 Phase

common

Dual-B-Dual Volt 3PH-B-3 Phase

common

Minimum width 1"; 5/8" to 1" wide available but leads will be one on each end

LD

L

LT

Minimum width 3/4"

Electric Plugs

Plugs and receptacles for connecting heater bands. Available in basic styles commonly used in European machines. Straight or angled 2-pin plugs with steel or brass prongs in ceramic or rubber insulation with metal case.

Part Number	Type	AMPS	Configuration
B2M	Silicone Rubber Case	16	Straight Stem
A92M	Silicone Rubber Case	16	90° Angle Stem
B3M	Aluminum Case	25	Straight Stem
A93M	Aluminum Case	25	90° Angle Stem

Silicone Rubber Heaters

Fiberglass reinforced Silicone Rubber Heaters are moisture and chemical resistant. Although thin and flexible, Silicone Rubber Heaters have a rugged construction and can be made to adhere to practically any surface. These heaters can accommodate holes and cutouts, and can come with a PSA back or a thermostat. Silicone Rubber Heaters are suitable for temperatures below 500°F.

C.S.A. Certified!

Specifications

Max. Size	38" x 98"
Thickness	0.060"
Max. Temp.	450°F
Max. Voltage	480 VAC
Wattage	+5/-10%
Std. Lead Wire	12" PTFE Insulated
Dielectric Strength	1000 VAC

Immersion Heaters

Part Number	Description
30700	Immersion Heater #09-019A, 115V, 650W
30701	Immersion Heater #09-019B, 115V, 1000W
30702	Immersion Heater #09-019C, 115V, 2160W

IMMERSION HEATERS

Important/ Caution: Heated section **MUST** be inside of the groove. A small portion of the unheated section may be inside of the groove.

Any heated section outside and exposed to open air will fail. Also the 30mm cold section on each end **MUST NOT** be bent.

hotset

Disappointed by downtime and waiting for your tubular heater?

- Reduce costly, unnecessary downtime
- Reduce your stocking requirements
- Eliminate tooling or setup costs
- Tap in place with a rubber mallet
- Order today, resume manufacturing tomorrow!

Easily select the correct 8.0mm Hotflex® flexible tubular heater

1. Measure and add total lengths in each category for the diameter that applies to your application.

8.0mm groove ø

	Totals	
2. Length of each straight section	<input type="text"/> × 1 =	<input type="text"/> a
3. Length of each 10mm radius	<input type="text"/> × .92 =	<input type="text"/> b
4. Length of each 12.5mm radius	<input type="text"/> × .93 =	<input type="text"/> c
5. Length of each 15mm radius	<input type="text"/> × .94 =	<input type="text"/> d
6. Length of each >15mm radius	<input type="text"/> × .96 =	<input type="text"/> e
7. Add lines a,b,c,d and e	+	<input type="text"/>
8. Add 60mm for the cold section (30mm + 30mm)	+ 60	<input type="text"/>
9. Round this number down to the nearest 50mm increment

Mini Coil Heaters

70 & 80 Series

70 Series Mini Coil Heaters offer a very long life solution to precision-heating applications such as hot runner systems. The hermetically sealed construction prevents moisture from entering the heater, resulting in very long life and long-term resistance stability. A standard resistance tolerance of $\pm 2\%$ produces excellent cavity-to-cavity repeatability in runnerless systems and is easier to control than more loosely tolerated heaters. The heater's nickel sheath is much more efficient for heat transfer than the stainless steel and Inconel sheaths used by other manufacturers, and makes the cold leads more flexible for ease in routing through wiring channels.

MINI COIL HEATERS

Specifications

Dielectric strength – 800 VAC
 Current leakage – <0.1 mA at 240 VDC (cold)
 Insulation resistance – >100 M Ω at 500 VDC (cold)
 Cable diameter – 0.055" (1.4mm)

Standard Features

Hermetic seal
 72" insulated leadwire
 200 Series nickel sheath

80A20	534233	n/a	0.75	1.2"	240

5" & 7" lead lengths

Standard Features

Hermetic seal
 72" insulated leadwire
 200 Series nickel sheath (cold)

Specifications

Dielectric strength – 1000 VAC
 Current leakage – <0.1 mA at 240 VDC (cold)
 Insulation resistance – >100 M Ω at 500 VDC
 Cable diameter – .075" (1.9mm)

Utilizing the same technology as our 70 Series, the 80 Series, larger cross-sectional area results in exceptional electrical properties. As with the 70 Series heaters, the hermetically sealed construction prevents moisture from entering the heater, resulting in very long life and long-term resistance stability. A standard resistance tolerance of $\pm 3\%$ ($\pm 2\%$ upon request) produces excellent cavity-to-cavity repeatability in hot runner systems and is easier to control than more loosely tolerated heaters. The flattened nickel sheath is much more efficient for heat transfer than the SS and Inconel sheaths used by other manufacturers which results in faster heat-up than even our 70 Series. 80 Series mini coil heaters are offered in a variety of sizes, wattages and clamping options. Standard diameters are .750", .875" & 1.000"; other sizes & wattages available on request.

F

Heaters

Kappa® Heaters

The Kappa Series Heaters are constructed with a nickel-plated copper inner sleeve and a stainless outer sleeve. The heater is tightly sandwiched between these sleeves eliminating the heat transfer problems associated with other dual-sleeved designs. The materials used direct the heat inward toward the nozzle, resulting in a very efficient heater with even heat distribution. The tightly-toleranced I.D. allows a slip fit with no clamping required.

Features

- Slip fit, no clamp required
- Very long life
- Efficient
- Optimum heat distribution
- Profiled heating available
- Low profile

Specifications

- Over 100 watts/in² possible
- 5- and 7-inch cold leads standard
- ± .0005 inch I.D. tolerance
- ± 2% resistance tolerance
- 72-inch lead wires standard
- 0.130" wall thickness

Watlube

Cartridge Heater Release and Heat Transfer Agent

A protective lubricant for use when installing any cartridge heater. It provides a tighter fit, thus improving thermal conductance, permitting higher watt densities and extending heater life.

As a barrier to high temperature oxidation, it assures easy removal of the heater after extended service.

Simple to apply. Avoid contact with leads or end plug.

Size	Part Number
4 oz.	WATLUBE

Watlube

Cartridge Heater Release and Heat Transfer Agent

A protective lubricant for use when installing any cartridge heater. It provides a tighter fit, thus improving thermal conductance, permitting higher watt densities and extending heater life.

As a barrier to high temperature oxidation, it assures easy removal of the heater after extended service.

Simple to apply. Avoid contact with leads or end plug.

Size	Part Number
4 oz.	WATLUBE

Cartridge Heaters

Lead Options

For customers having special requirements, DME offers the lead options shown on these pages. These swaged-in, flexible leads offer a wide choice in terms of capacity, cost, size, durability and ease of installation. Available from stock in any diameter with any lead length.

These lead adaptations are of improved construction and will stand up to extra heavy usage. Unheated sections are reduced up to one-half the area, resulting in lower watt densities and consequent longer life. Leads are flexible over their full length.

Modification Type	Length Dia.	Length Added to Heater	Std. Unheated Portion	Std. Lead Length
Swaged-in flex leads	all	3/16"	7/16"	10"
Swaged-in stainless steel braid	1/4"	3/4"	1"	14"

	1/4"			
Swaged-in stainless steel conduit	3/8"	3/8"	5/8"	14"
	1/2"			
	5/8"			
	3/4"			

Right Angle Swaged-In Leads

For applications where space is limited or confining, swaged-in flexible leads are also offered in right angle configuration with lead wires exiting at side of sheath.

These lead options are available only on Premium Cartridge Heaters.

Modification Type	Dia.	Length added to heater	Unheated portion	Std. lead length

CARTRIDGE HEATERS THERMO-COUPLE

Drum Heaters

Our Drum Heater is a portable, lightweight heat source designed for standard drum sizes but versatile enough for use on any similar-sized vessel where quick, adjustable heating is required.

The watt density does not exceed 8.5, so it is suitable for most materials and solutions requiring heat for handling, dipping, coating or mixing.

Features

- Heavy-duty cord & plug on all models
- Rust-resistant stainless steel
- Lightweight, one-piece construction
- Minimum - maximum heat control
- New heavy-duty construction

NEW! Secure Latch System Option Add

DRUM HEATERS

Cast Heaters are used to heat plastics injection molding and extrusion machinery, packaging machinery, sealer bars, laboratory heaters, hydraulic platens and many applications where durability and extended heater life is important.

Cast Heaters consist of high-quality tubular heaters cast into specific grades of non-ferrous alloys all chosen for excellent thermal conductivity properties.

Cast Heaters can be designed as band heaters, band heaters with cooling tubes, finned band heaters and platen heaters. The Cast Heaters can be supplied with strap lockup or flange lockup, armoured cable leads, terminal posts or protective terminal boxes.

Air-Cooled Finned Heaters

Cast aluminum finned heaters are designed to provide rapid cooling response and temperature control on air-cooled machines and are incorporated as original equipment by many extruder manufacturers.

Cylindrical heat and cool heaters for extrusion machinery

Platen heaters for packaging, food warming & die heating

Cylindrical finned heaters for air-cool extrusion machinery

Glue pots and pan heaters for industrial and food warming applications

SCR Power Controls

Power Up/Power Down All Units-Fused and Ready to Mount!

Applications

- Nozzle band heaters
- Hot runners
- Band or cartridge

Features

- Compact and durable design
- Half the price of an electro-mechanical voltage controller
- Solid state reliability
- Low price, high quality

SCR POWER CONTROLS

Model 18TBP/TB Controls

Provide infinitely variable control of single-phase AC voltage to resistive heating elements. These controls are solid-state replacements for variable transformers, saturable core reactors, and electro mechanical contactors. Power Triacs replace contacts and brushes to control electric power without moving parts, and, when operated within their stated ratings for current, voltage, and temperature, have no known life expectancy rating.

18TBP Series, single hole mounting to panels and enclosure doors

Panel- or Chassis-Mount

Model 18TBP controls are compact, lightweight packages that employ single hole mounting to panels and enclosure doors. Model 18TB controls are designed for rear or rack mounting.

Performance Note

Triac power circuits may "slave" when multiple units are used on 240 VAC lines derived from three-phase mains. For optimum performance, use on single phase, 240 VAC derived from 3-wire, 120/240 VAC mains.

Part Number	Input Volts	Max AMPS	Output Voltage
18TBP1-15	120V	15 AMP	0-120
18TBP2-15	240V	15 AMP	0-240

Note: Use only factory-recommended fuses

Note: Use only factory-recommended fuses

Part Number	Input Volts	Max AMPS	Output Voltage
18TB1-25	120V	25 AMP	0-120
18TB2-25	240V	25 AMP	0-240

18TB Series designed for rear or rack mounting

18TP Series Features

- 5 and 10 AMP load capacity at 120 or 240 VAC
- Lighted ON/OFF switch
- Built-in "2 millisecond" fuse protection
- 6' power cord with plug
- NEMA standard 120 or 240 VAC receptacle
- Small size - only 4.7" x 3.3" x 2.5"
- Low price, high quality

Part Number	Input Volts	Max AMPS	Output Voltage
18TP1-10	120V	10 AMP	0-120
18TP2-10	240V	10 AMP	0-240

Temp/Process Controller

Fuzzy Pro™

Choose 1/16, 1/8 or 1/4 DIN

These units feature a 10 AMP relay!

Features

- PID - FUZZY or On/Off control
- Heating/cooling + 2 alarms
- Field input selection TC, RTD, linear
- Outputs relay, pulsed DC, 4-20 mA
- Dual display- red/green + LED% output
- Self tuning with inhibited overshoot
- Low panel depth 3 1/8" (80mm)
- 16 ramp/dwell segments option

- Heater saver power limit function
- Multiple alarms on a single output
- Scalable linear input
- Rapid cycling controls faster systems
- Customized operator interface
- Setpoint range limit
- Plug in from front
- Operator lockout security setting

TEMP/PROCESS CONTROLLER

DIN Size	Part Number	Output Type	Alarm or Cooling Output
1/16	F16101	Relay, SPBT 3A/240 VAC	Relay 10A/240V SPST
1/16	F16201	SSR Pulse/20 VDC/20mA	Relay 10A/240V SPST
1/8	F18101	Relay, SPST 3A/240 VAC	Relay 10A/240V SPST
1/4	F14101	Relay, SPST 3A/240 VAC	Relay 10A/240V SPST

Gentran Transducer

Plastic Melt Pressure Transducer GT76

Precise Pressure Measurement

Gentran Models GT72 and GT76 have non-linearity specifications of $\pm 0.5\%$ and $\pm 1.0\%$ of full scale BFSL, respectively. Repeatability for both models is better than 0.1% of full scale.

Easily Installed

These transducers can be installed directly into the extruder, melt pump or other pressure tap. All mating cable assemblies are terminated with spade lugs for simple electrical connection.

Industry Compatible

All Gentran products are configured to industry standards for effortless replacement of parts. We offer compatible units complete with flexible armor stems so that you can replace a transducer without disturbing your existing wiring or indicator configuration.

Versatility

Gentran offers various body lengths, thread dimensions and options for thermocouples. Integral, flexible armored cable is also available. For special applications, we can custom design unique configurations to fit your needs.

Rugged and Durable

Our units last up to six times longer than other units because of our thicker 17-4 PH stainless steel diaphragms that operate from 0 to 750°F.

Melt Pressure Gauges

Rigid Stem

Melt Pressure Gauge - Model ERTG

Melt Pressure Gauge Model ERTG is a totally mechanical device, requiring no power. This rugged, totally self-contained Melt Pressure Gauge is available in either 0–5,000 psi or 0–10,000 PSI ranges. This gauge allows the user to benefit from the improved efficiency and quality that goes along with melt pressure monitoring at an affordable price.

Melt Pressure Gauge Model ERTG comes standard with a 6" rigid stem, 1/2–20 UNF mounting thread.

Features & Benefits

- Requires no electrical power and is totally maintenance free
- All stainless steel construction
- Large 4" gauge head with safety glass can be rotated 300° for pressure reading convenience
- Accuracy +/- 2%
- Optional type J or type K thermocouple output

Temperature Controllers

UATC20 Temperature Controllers

The UATC20 Temperature Control Module is a fully microprocessor based unit which has been intelligently designed for Hot Runner Mold Temperature Control Applications where advanced operational and diagnostic features are needed.

The well developed circuitry of the UATC20 produces a module which is simple to operate, rugged and dependable. The advanced diagnostic functions (which are operator programmable to the specific heating zone) provide a snapshot of the operation of that specific heating zone.

Some of the exceptional Analytical functions found on the UATC20 are:

- A diagnostic snapshot of the heater operating characteristics are revealed when the current sensing feature is employed.
- Detects and alerts to the potential dangerous conditions of current leaking to ground.
- If power to the heater exceeds a selected value, the module will alarm and disable power to the heater preventing damage.
- Advanced circuitry detects, alarms and disables power to the heater in the event the triac fails in a shorted condition.
- Heater diagnostics can be performed by checking the average amperage draw of the heater.
- In the event of a thermocouple, open or shorted condition, the module will automatically go into "APO" (Average Power Output) mode, allowing operations to continue by providing the same average power to the heater as applied prior to the failure.
- Real time diagnostics fault detection & error display.
- Audible alarm warns in the case of an error condition.
- A diagnostic snapshot of the heaters operating characteristics are revealed when the current sensing feature is employed.

UATC20

The UATC20 Temperature Control Module is a fully microprocessor based instrument, which has been intelligently designed for Hot Runner Mold temperature control applications where advanced operational and diagnostic features are needed. The well developed circuitry of UATC20 produces a full featured module which is simple to operate and will stand up to rigors of harsh environments.

An interesting feature of the UATC20 is its capacity to provide a snapshot of operation of the heating zone by displaying amperage draw. The UATC20 also has the ability to adjust maximum amperage draw to a point just above maximum wattage of the heater. When the controller detects a current which is greater than that value, it will sound an alarm so the offending components can be replaced. This improvement allows for greater operating and maintenance efficiency by detecting leakage in mold wires, cables, heaters, etc. at an early stage.

The Circuitry of the UATC20 provides improved protection to the mold in the event that the triac becomes shorted. This circuitry enables the controller to turn off the power to the heater if it detects continued power draw when the temperature is well above the set point.

ITC has addressed one of the most serious and costly problems of Hot Runner Temperature Controllers by incorporating of our Anti-Arching Feature. This enhancement can greatly reduce the probability of damage to either the main frame or module if a module is accidentally changed while the main frame is under power. This feature alone can save molders lot of money for repair or replacement.

FEATURES

- All features and parameters are fully selectable from the menu feature on the keypad.
- Amperage measuring & display.

- APO (average power output) in thermocouple failure condition.
- Automatic test of "LED" segments.
- Operating voltage 240vac, 50/60 Hz, or 120vac
- Cold junction compensation.
- Zero crossing triac.
- This module operates of ITC's 15 amp main frames.
- Ground Fault Detection – detects if there is a short to ground in the heating circuit. This is selectable range.
- High Amperage Alarm – detects if the amperage draw to the heater exceeds a selectable value which can be
- Entered from the menu.
- Thermocouple – Open, Shorted & Reversed. This is indicated by both an error message and audible alarm.
- Triac – Open and Shorted condition. This is indicated by both an error message and audible alarm.
- High & Low Temperature Condition – Activates when the process temperature varies more than 30° F from set point. This is indicated by both an error message and audible alarm.
- Blown Fuse – This is indicated when the blown fuse "LED" comes on

SAFETY FEATURES:

- High Voltage Thermocouple Protection – Fused
- Module High Current Protection – Fused
- Power Disabled to Heater when:
- Triac is Shorted
- Heater is Open
- High Amperage Condition
- Triac is Open
- Over Temperature Condition
- Audible Alarm

Voltage: 208 to 240vac, single phase

Current: 15 amps

Frequency: 50/60 Hz

Wattage: 3600

On/Off Key: Auto Latching (stays on last setting if power is lost)

Physical Configuration: Plugs in for easy interchangeability

Compatibility: Compatible with "G" Series housings

Size: 2" Wide, 7" High, 7-1/2" Deep

Weight: 1-1/2 #

DC Power Supply: Internally generated regulated and compensated

Module Power Usage: Less than 5 watts, excluding load

Set point Range: 0o to 999o F (537o C)

Control Accuracy: +/- 1o F (0.5o C) dependent on total thermal system

Calibration Accuracy: Better than 0.2% of full range

Operating Temperature Range: 32 to 120 degrees F (0 to 48° C)

Thermocouple: Type J, or Type K grounded or ungrounded

External Thermocouple Resistance: High impedance potentiometer input allows long distance T/C wiring

Output Drive: Internal solid state triac, zero crossing AC pulses

Ground Fault Sensitivity: 60 to 180 mA, default 120 mv.

High/Low Temperature Alarm: Factory set @ +/- 30 degrees F (16° C)

Overload Protection: Fuses on both sides of AC line

Transient Protection: dv/dt and transient pulse suppression

Shorted Triac Heater Protection: Highly sensitive, fast acting relays cut power to load

Temperature Controllers

UATC20 Temperature Controllers

Power Line Isolation: Optically and transformer isolated from AC lines. Isolation voltage greater than 2500 volts

Display: Dual LED displays, 3-digit, 7-segment

Manual Mode: Maintains constant output power to within 1% of manual set power. Adjustable from 0 to 100%

Soft Start: Variable stepped voltage, phase fired

Soft Start Duration: 5 Minutes (Adjustable – 0 to 20) up to 212° F (100° C)

Soft Start Override: Temperature 212° F (100° C)

Operational Modes:

- Soft Start precedes Auto Mode
- Thermocouple break overrides Soft Start and Auto Mode
- Reversed or shorted thermocouple overrides Soft Start and Auto Mode
- Manual Mode overrides thermocouple break, reversed, shorted thermocouple and Auto Mode.
- Output is disabled during all fault conditions.

Cold Junction Compensation: Automatic, better than 0.02°F/F° (0.01°C/C)

Open Thermocouple Protection: Automatically disables power to heater or Average Power Output (APO). Selectable

Reversed Thermocouple Protection: Automatically disables power to heater

Shorted Thermocouple Protection: Automatically disables power to heater or Average Power Output (APO). Selectable

Selectable

Warranty: 2-Years

MFH1

The MFH1 Single Zone Temperature Control System delivers precise temperature control with enhanced diagnostic and control functions. This 10 amp, microprocessor based temperature control system is compact in size, enclosed within a rugged extruded frame and manufactured to standup to the rigors of industrial environments.

Employing the latest in microprocessor technology, the MFH1 offers the user many improved and unique operating features, which provide ease of use, menu selectable flexibility with advanced PID control algorithm for precise control.

Unlike others the MFH1 does not use a wimpy lightweight sheet metal enclosure, but instead the MFH1 uses a robust heavy wall extruded frame which will withstand industrial use.

SUPERIOR FEATURES:

- Compact
- Durable
- Full Featured
- Easy to use
- Enhanced Diagnostic Features

Large, Dual Digital Displays (Temperature, Setpoint, Error Codes)

Audible Alarm

Rear Mounted Fuses

Soft Start "LED" Indicator

Heater Load "LED" Indicator

Bumpless Transfer—APO (average power output)

SELECTABLE FEATURES:

Auto or Manual Operation – LED mode indicator

Type J or K Thermocouple – LED mode indicator

F° or C° Temperature Range – LED mode indicator

Amperage Monitoring & Display – LED indicates

AMP mode

- Audible Alarm – Selectable on /off
- Front Panel Lockout – Selectable on/off

MFH1

MFH1 Temperature Controllers

ENHANCED DIAGNOSTICS:

- High/Low Temperature LED – Selectable Range
- tCr Error Display – Thermocouple Reverse
- tCO Error Display – Thermocouple Open
- tCS Error Display – Thermocouple Shorted
- tOh Error Display – Triac/Heater Open
- tSh Error Display – Triac Shorted
- HiC Error Display – High Amperage Alarm – Selectable Range

SAFETY FEATURES:

- High Voltage Thermocouple Protection (fused)
- Module High Current Protection (fused)
- Electrically Isolated Front Panel
- Power Disabled to Heater:
- Triac Shorted
- Triac Open
- Heater Open
- Over Temperature
- High Amperage

Product Specifications – * Specifications may change without notice

- 208 to 240VAC, single phase
- 50/60 Hz
- 10 Amp Capable
- 2400 Watts
- Size: 6 1/2" Wide, 2" High, 10" Deep
- Control System Power Usage, Less than 5 watts
- Set Point Range – 0° to 999° F
- Control Accuracy – +/- 1° F (0.5° C)
- Calibration Accuracy – Better than 0.2% full range
- Cold Junction Compensation
- Operating Temperature Range -32° to 120° F
- Output Drive – Internal solid state triac, zero crossing AC pulse

OPTIONS:

MPTC10 OR MPTC20 - Single Zone Mold Power / Thermocouple Cable

CKPTM1 - Single Zone Cable End Kit—For Frame End:

NOTE: CKPTM1& MFH1-IPP are provided.

SPECIFICATIONS:

Maximum Amperage: 10 Amps 2400 Watts

Input Power: 240 VAC, Single Phase, 3 wire (2 AC & 1 Ground), 50/60 Hz.

Power to Heater: 240 VAC Single Phase, 50/60 Hz. 10 Amps Max.

Thermocouple: Type "J" or "K"

Mold Interface: Accomplished with an optional combination power and thermocouple cable with ground, Five (5) wire.

(Part No. MPTC10 OR MPTC20).

Dimensions & Weight: 2" (H) x 7" (W) x 11.5" (D) Approx. 7 lbs. (without cables & connectors)

Construction: Totally self contained system with heavy duty extruded aluminum frame: Combination Power & Thermocouple connector (CKPTOC1), 5 pin, female is mounted on rear of cabinet. Input Power Plug (MFH1-IPP) is mounted on rear of cabinet. (Combination Power/Thermocouple connector & Input Power Plug are supplied standard with this system)

Temperature Controllers

MFH1 Temperature Controllers

Accessories – Supplied: CKPTM1 -Cable End Connector (Combination Power/Thermocouple) which plugs into cabinet. MFH1-IPP -Cord End Connector for Input Power Cord (Must use SJO 143 Style & Type of power cord).

- Accessories – Not Supplied: Main Frame Connector (CKPTOC1) Mold Connector (CKPTIC1) Combination Power/Thermocouple Cable (MPTC10 OR MPTC20) Input Power Cord (MFH1-IPC).
- Input Power Cord: CAUTION -If customer is going to make their own input power cord, Use only SJO 14-3 type and style of power cord. Only this type and style of cord will fit the supplied connector.
- Power Usage: Less than 5 watts
- Setpoint Range: 0° to 999° F
- Control Accuracy: +/- 1° F (0.5° C)
- Calibration Accuracy: Better than 0.2% full range
- Operating Temperature Range: -32° F to 120° F
- Output Drive: Internal Solid State Triac, zero crossing, AC pulse
- Transient Protection: dv/dt and transient pulse suppression
- Shorted Triac Heater Protection: Highly sensitive, fast acting relays cut power to load
- Power Line Isolation: Optically and transformer isolated from AC lines. Isolation voltage greater than 2500 volts
- Display: Dual LED displays, 3-digit, 7-segment
- Manual Mode: Maintains constant output power to within 1% of manual set power. Adjustable from 0 to 100%
- Soft Start: Variable stepped voltage, phase fired
- Soft Start Duration: 5 Minutes (Adjustable – 0 to 20) up to 212° F (100° C)
- Soft Start Override: Temperature 212° F (100° C)
- Operational Modes:
 - Soft Start precedes Auto Mode
 - Thermocouple break overrides Soft Start and Auto Mode
 - Reversed or shorted thermocouple overrides Soft Start and Auto Mode
 - Manual Mode overrides thermocouple break, reversed, shorted thermocouple and Auto Mode.
 - Output is disabled during all fault conditions.
- Cold Junction Compensation: Automatic, better than 0.02°F/F° (0.01°C/C)
- Open Thermocouple Protection: Automatically disables power to heater or Average Power Output (APO). Selectable
- Reversed Thermocouple Protection: Automatically disables power to heater
- Shorted Thermocouple Protection: Automatically disables power to heater or Average Power Output (APO). Selectable
- Warranty: 2-Years

Temperature Controllers

NOTE: ITC brand mainframes for USA and Mexico use only. Outside of US please buy the DME standard MFP Main Frame Package.

NOTE: Control cards not included with mainframes.

MF12150

- Input Voltage: 240vac, 3 Phase, 50/60Hz
- Heater Voltage: 240vac, Single Phase
- Max. Amps per Zone: 15 Amps

ACCESSORIES:

- Mold Cable: MPC12C10G, MPC12C20G or MPC12C30G

- Max. Amps per Zone: 10 Amps
- Total System Watts: 2,400 Watts

ACCESSORIES:

- Mold Cable: MPTC10 or MPTC20
- Mold Connector: CKPTIC1
- Module: UATC20

Universal Floor Stand

The Universal Floor Stand will accommodate all 15 or 30 amp

Mainframes from one to four sections high. Stand is made from heavy gauge steel and includes locking casters (400 lb. rating).

All assembly and Mainframe mounting hardware is included. Heavy duty floor stand available for larger systems (1000 lb. rating).

ITEM NUMBER	RATING
MFS512G	400 LBS

Floor stand comes with plates for 5-zone frame mounting on 8-zone "x" pattern

Terminal Box Detail and Mold Connectors

Terminal Mounting Boxes

Terminal Mounting Boxes provide the easiest and most economical method of mounting power and thermocouple connectors on the mold. Constructed of plated, heavy-gauge steel, each box is pre-cut and drilled for quick mounting of the connector to the box, and box to the mold. Connector mounting hardware is supplied. Connectors are ordered separately.

NOTE: Overall dimensions shown include allowances for hardware (assembly screws) but not connectors.

* Used with 2-zone, 15 AMP mainframe MFFPR2G ** Used with 1-zone, 30 AMP mainframe MFHP1G

Temperature Controllers

Standalone Integral Controller

Single and Two-Zone 10 AMP Mainframes

The DME Portable 10 AMP Mainframes are designed for use with 10 or 15 AMP* Smart Series or G-Series Temperature Control Modules. Mainframe is supplied with power input and power-thermocouple output connectors. Circuit breaker provides safety for operation. Control modules and cables are to be ordered separately.

Note: Maximum safe operating amperage is 10 AMPS per zone when using 15 AMP modules. If application will draw more than 10 AMPS per zone, use 15 AMP Mainframe (MFFPR2G).

* User must install ABC10 (10 AMP) fuses in the 15 AMP control modules to protect the mainframe.

Single and Two-Zone 10 AMP Mainframes (50–60 Hz, Single Phase)

Zones	Part Numbers**	Volts	Watts Per Zone	Connectors Supplied
1	MFP1G1	120	1200	(1) AC1512F (Power In) (1) CKPTM1 (Power-TC Out)
1	MFP1G	240	2400	(1) AC2024F (Power In) (1) CKPTM1 (Power-TC Out)
2	MFPR2G	240	2400	(1) AC2024F (Power In) (2) CKPTM1 (Power-TC Out)

** Includes frame and connectors listed. Modules and cables ordered separately.

Note: Replacement power connectors in frame are also available on special order.

Recommended Mold Pocket Layout

(For Mold Power-Thermocouple Input Connector CKPTIC1)

A: AC2024F (power to mainframe); AC1512F supplied with MFP1G1
B: CKPTM1 (connector to heater)

This single-zone controller is ideal for use with Straight-Shot hot sprue bushings.

A: AC2024F (power to mainframe);
B: CKPTM1 (connector to heater)

Single zone, horizontal 10 AMP controllers (SSH1022/21) also available following page.

Dimensions
Frame 7"W x 9"H x 10"D
(9"H dimension does not include connectors or handle)

Temperature Controllers

RoHS/WEEE Compliant Smart Series® Single Zone Temperature Controller

SSH1022/21 (10 AMP)

- Compact
- Easy-to-use
- Includes new, improved and unique features
- Provides microprocessor-based PID control
- More accurate than analog or variac controllers
- Built-in thermocouple diagnostics
- Ideal for use with a hot sprue bushing or a machine nozzle

Key Features

- Large digital display
 - For easier readability of temperature, % power and faults
- Setpoint pushwheel
 - For setting desired setpoint temperature
 - Allows adjustment of setpoint before turning power on
- AUTO % power display
 - Shows % power output while in AUTO mode
 - Indicates average % power requirement on thermocouple failure
 - A diagnostic tool for solving problems

Switchable Options

- Shorted thermocouple sensitivity adjustment
 - Operation can be tailored to fast or slow reaction times
 - Sensitivity can be adjusted with internal switches
 - Very useful for zones with long startup times
- Switchable °C/°F operation
 - Scale indicated at startup
- K type thermocouple support
- Cut feature
 - Gain cut feature for small nozzles and heaters with ungrounded internal thermocouples

Operational Refinements

- Improved SmartStart®
 - A more gradual temperature rise leads to a more effective heater dry out period, thereby extending heater life
 - SmartStart® now available as an option in manual mode
- SelectiveCycle®
 - A very high-speed power output approach
 - Enables accurate temperature control and longer heater life
- Bumpless transfer
 - When a thermocouple failure occurs, operation is automatically continued with a learned % power
 - Unique software accurately assigns percent power setting
- Third fuse
 - Allows for display of low temperature alarm when the load fuses are blown

Front Panel Digital LED Indicators

Temperature Controllers

RoHS/WEEE Compliant Smart Series® Single Zone Temperature Controller

SSH1022/21 (10 AMP)

Controller includes 19-foot power cord, mating mold power and thermocouple connector (CKPTM1) and two spare fuses (ABC10). Additional cables and/or connectors must be ordered separately. See following page for detailed information on cables and connectors. Warranty: Three year (excluding triac and fuses).

Controller Part Number	Volts (VAC)
SSH1022	240
SSH1021	120

Cable* Part Number	Length (Feet)
MPTC10	10
MPTC20	20

Front Panel Controls and Indicators

- Process Temperature Display:**
Shows process temperature, thermocouple faults and other operational modes. Displays % power when switch (3) is pressed down.
- Temperature Deviation Lights:**
Indicates deviation from setpoint. Outer lights blink at more than $\pm 40^{\circ}\text{F}$ (22°C) from setpoint.
- Auto/Manual/% Auto Power Switch:**
Selects AUTO or MANUAL control mode. Shows % power when pressed into "% AUTO" position.
- LED Mode Indicators:**
Left LED illuminates during manual mode. Right LED illuminates when power is supplied to heater. Right LED blinks during SmartStart®.
- Setpoint Pushwheel:**
Three-digit switch programs setpoint in AUTO mode. Right two digits program % power in MANUAL mode.
- Power On/Off Switch:**
Controls AC power to module.

Mold Power and Thermocouple Connector* Part Number
CKPTIC1

F

Rear Panel

- Mold Power and Thermocouple Output Connector:**
CKPTIC1 connects to the heater and thermocouple. Mating connector CKPTM1 is supplied with controller.
- Power Input Cord:**
Nineteen-foot cord supplies power to controller. Plug supplied with SSH1021 (120 VAC) units. No plug supplied with SSH1022.
- Load Fuse Receptacles:**
Provides safe and easy replacement of load fuses.

* Items ordered separately

Temperature Controllers

RoHS/WEEE Compliant: Smart Series® Single and 2-Zone Mainframe Accessories (10 AMP)

For Use With MFP1G, MFP1G1, MFPR2G, SSH1022 and SSH1021

Mold Power-Thermocouple Input Connector

A Single-Zone Power-Thermocouple Input Connector is available for mounting in or on the mold to accept the power-thermocouple cable from the mainframe. Water resistant, the connector has an integral retaining latch for a secure cable connection and numbered screw-type terminals for power and thermocouple lead wires.

*Can be mounted on top of mold for use with DME Straight Shot hot sprue bushings.

Part Number
MPTC10
MPTC20

Armored Mold Power-Thermocouple Cables

Single-Zone Mold Power-Thermocouple Cables are constructed of special lead wire for use in high temperature environments, and are available to connect the mainframe to the connector on the mold. Available in lengths of 10 or 20 feet. Integral retaining latches on the mainframe and mold connections provide secure cable connections. Connector configurations ensure proper insertion of cable.

Replacement Connector Kits (for Controller & Cables)

Male Power-TC Connectors

- CKPTM1 is on MPTC10/20 Cables; mates with Frame or CKPTF1L only
- CKPTM1L mates with CKPTF1 only

Female Power-TC Connectors

- CKPTF1 is on MPTC10/20 Cables; mates with Mold or CKPTM1L only
- CKPTF1L mates with CKPTM1 only

Temperature Controllers

RoHS/WEEE Compliant: Smart Series® Single and 2-Zone Mainframe Accessories (10 AMP)

Two-Zone 15 AMP Mainframes

Provides 15 AMP (3600 watts) per zone. For use with Smart Series or G-Series modules. Supplied with built-in cooling fan, power input, power output and thermocouple input connectors. Control modules and cables are ordered separately.

Two-Zone 15 AMP Mainframe (240 VAC, 50–60 Hz, Single Phase)

Part Number	Watts Per Zone	Connectors Supplied
MFFPR2G	3600	(1) AC1240F (Power In) (2) AC1524M (Power Out) (3) M2MJ (TC In)

Includes frame and connectors listed. Modules and cables ordered separately.

Part Number	Description
AC1240F*	Female 240 VAC twist-lock power input connector (mates with male frame power input)
AC1524M*	Male 240 VAC power output connector (mates with female frame power outputs)
M2MJ.*	Thermocouple mini-plug mates with frame as jack strip connector
PTC2TBGTS	2 zone, pre-wired terminal mounting box with terminal strip (mounts to mold; mates with PTC0110 or PTC0120 cables)

* Included with MFFPR2G

Frame Dimensions

7"W × 9"H × 10"D
(9"H dimension does not include connectors or handle)

Armored Mold Power – Thermocouple Cables (15 AMP)

Single-Zone Mold Power-Thermocouple Cable is constructed of special lead wire for use in high temperature environments. This cable connects the mainframe to the connector on the mold. Available in lengths of 10 or 20 feet. Retaining latches on the mold connector provide secure cable connections.

Part Number
PTC0110
PTC0120

For use with MFFPR2G only

Terminal Mounting Boxes – Prewired (15 AMP)

Terminal Mounting Boxes provide the easiest and most economical method of mounting power and thermocouple connectors on the mold. Constructed of plated, heavy-gauge steel, each box is pre-cut and drilled for quick mounting of the box to the mold (2-zone, prewired terminal mounting box with terminal strip shown with cover plate removed).

Male Plugs and Female Receptacles

- With screw terminals: 3 to 48 captive, backed-off screws for easy and convenient wire termination
- With crimped terminals 7 to 216 contacts
- Contacts are hard, silver-plated copper alloy. (Gold plating available in crimp versions.)
- Ground-safety feature “makes first, breaks last.”
- Insulators are interchangeable within either base or hood, and are key-molded to ensure proper assembly
- Terminals are number coded, front and back, for easy installation

Female Receptacles

Male Plug

Hood

- Built to withstand severe environmental and industrial hazards
- Provides protection against dirt, grease, oil, water, vibration and impact
- Durable, rugged, single-piece aluminum die casting
- Designed for flexible cable; adaptable for seal-tight connections
- Available with front, angled or top entry
- Fully adaptable - a multi-cut Neoprene gasket provides for cables of different sizes

Side Entry Hood

Top Entry Hood

Base

- Positive, spring-loaded locking-latches for quick connect and disconnect
- Designed with a lip-mounted Neoprene gasket for long protection against harsh environments
- Available in panel-mount base and single or double-entry, surface-mount base versions
- Available with spring-loaded or string-attached dust covers

Double Latch Base

Single Latch Base

DIAL THERMOMETERS

Non-Contact Thermometers

Wide Range Mini IR Thermometer

Compact Thermometer with Wide Temperature Range

- Measures temperature from -58 to 1000°F with 0.1° resolution up to 199.9°
- Built-in laser pointer identifies target area
- 2000 count backlit display
- Over range indicator
- Automatic data hold when trigger is released
- Fixed 0.95 emissivity covers 90% of surface applications
- Auto power off saves battery life
- Complete with 9V battery

Part Number 42510

Specifications	
Display Counts	2000 count backlit LCD
Basic Accuracy	±2% of reading
Field of View	8:1
Dimensions	3.2 x 1.6 x 6.3" (82 x 42 x 160 mm)
Weight	6.4 oz (180g)

Non-Contact Thermometers

Wide Range IR Thermometer with Type K Input

Measures Both Non-Contact and Contact Temperature Plus Stores 20 Readings

- Wide temperature range IR temperature and type K thermocouple measurements
- Automatic emissivity adjustment (for temperatures 212°F or higher)
- Memory stores up to 20 readings
- Large LCD display with bright backlight for easy-to-read measurements and programming parameters
- Laser pointer provides better aim and accuracy
- Auto-hold activates when the measurement trigger is released
- Adjustable high/low alarm alerts user visually and audibly when temperature exceeds programmed limits
- MAX/MIN/AVG/DIF features display highest, lowest, average, and MAX minus MIN values
- Data hold, auto power off, and low battery indication
- Switches built into handle allow for °C/°F display selection, auto power off defeat, and alarm on/off control
- Complete with 9V battery, type K thermocouple sensor (-4 to 482°F/-20 to 250°C), and carrying case

Part Number 42515

Specifications	
Display Counts	4000 count backlit LCD
Range	IR: -58 to 1472°F (-50 to 800°C) Type K: -58 to 2498°F (-50 to 1370°C)
Basic Accuracy	IR: (±2% of reading or 4°F/2°C) whichever is greater < 932°F/500°C ± (2.5% rdg +5°) > 932°F/500°C Type K: (±1.5% Reading + 5° For 3°C)
Max Resolution	0.1°F/°C
Emissivity	Adjustable 0.10 to 1.00
Field of View	13:1 distance to target ratio
Dimensions	3.2 x 1.6 x 6.3" (82 x 42 x 160 mm)
Weight	6.4 oz (180g)

NOTE: The included type K temperature probe plugs into bottom of handle when in use.

Type K Thermometers with single or dual input direct or differential measurements to 0.1°

Features

- Rugged design for field use - includes rubber holster
- Dual input model provides differential readings
- Accurate to 0.3%, C°/F° switchable
- Front panel offset adjustment to optimize accuracy
- Displays maximum reading plus data hold on large LCD display
- Includes (6) AAA batteries, holster with stand, and temperature probe

EXTECH
INSTRUMENTS

Single Input – Part Number EA11

Dual Input – Part Number EA10

Weight	8.3 oz. (235g)	

Principles of Thermocouples & Thermocouple selection

General Information

Thermocouples are the most widely used devices to measure temperature in the injection molding industry. They consist of a welded (hot) junction, between two lead wires of dissimilar metals (usually iron and constantan, Type J) and a reference junction at the other end of the lead wires. The hot junction creates an electrical current which can be measured at the reference junction. This measurement corresponds to a specific temperature, which provides output reading or control switching. Advantages of using thermocouples include the ability to measure a wide temperature range, durability at high temperature, fast response time, and low cost.

Junctions

Grounded – In grounded thermocouples, the conductors are contained in a stainless steel sheath. The hot junction is welded to the end of the sheath (see diagram 1). This provides high durability and environmental protection without sacrificing response time. The disadvantage of this construction is that there is no electrical protection from voltage surges coming into contact with the sheath. Grounded construction is the most common thermocouple type used in the plastics industry. Most DME thermocouples are grounded. Insulated thermocouples are available on request.

Ungrounded (Insulated): In ungrounded construction the hot junction is insulated from the sheath within mineral insulating compound (see diagram 2). This provides complete isolation from any stray voltage that may be present in the application. The drawback with this construction is increased response time due to increased time for heat to penetrate the insulation and reach the hot junction.

Exposed – The conductors extend beyond the sheath (see diagram 3), providing very rapid response time, but no protection from the environment or stray voltages. Exposed thermocouples are fragile.

Fig. 1

 **Grounded**
Hot junction welded to sheath tip. Earthed output provides fast response time.

Fig. 2

 **Insulated**
Hot junction insulated from sheath. Insulation resistance over 100 Megohms.

Fig. 3

 **Exposed**
Hot junction extends beyond sheath.

Calibration (Type)

Thermocouples are made of two dissimilar metals with specific electrical characteristics. The specific metals used determine the type of thermocouple. Most thermocouples used in the U.S. plastics industry are Type J (iron/constantan). Less commonly used is Type K (chromel/alumel). Check your machine or temperature control to determine which type you need. If you are unsure, determine the type from the wire color coding in the table

ISA Code	Conductor Characteristics		Temperature Range (°F)	Limits of Error		Application Notes
	Positive	Negative		Standard	Special	
J	Iron (magnetic)	Constantan (non-magnetic)	0 to 530	±4.0°F	±2.0°F	Reducing atmosphere recommended
			530 to 1400	±0.75%	±0.38%	
K	Chromel (non-magnetic)	Alumel (magnetic)	0 to 530	±4.0°F	±2.0°F	Oxidizing atmosphere recommended
			530 to 2300	±0.75%	±0.38%	
T	Copper	Constantan	-75 to 200	±1.8°F	±0.9°F	Can be used in oxidizing or reducing atmosphere; Corrosion resistant
			200 to 700	±0.75%	±0.38%	
E	Chromel	Constantan	0 to 600	±3.0°F	±1.8°F	Oxidizing atmosphere recommended; highest EMF output
			600 to 1600	±0.5%	±0.38%

Standard Thermocouples

STANDARD

Straight model TCJ

Standard Thermocouples have a variable immersion depth of 1 1/4" to 1 3/4" with a probe mounting length of 2 1/2". Featuring heavy-duty armor covered leads with standard wire lug lead termination and a 3/16" probe diameter, they will accommodate most requirements in either a straight or 90° bend. Off-the-shelf delivery and a very low price make our standard thermocouples just what you need. Also available in K & RTD types.

Standard Thermocouple

Part Number	Lead Length	End
TCJ1048	48"	Straight
TCJ1060	60"	Straight
TCJ1072	72"	Straight
TCJ1120	120"	Straight

90-degree bend model TCJ9

Standard Thermocouple - 90°

Part Number	Lead Length	End
TCJ9-1048	48"	90°
TCJ9-1060	60"	90°
TCJ9-1072	72"	90°
TCJ9-1120	120"	90°

Shallow Nozzle Thermocouples

Shallow nozzle thermocouples are available in J or K type and 3 thread sizes. Our 1/2" swivel will seat in shorter holes but also provide accurate readings in deep holes.

Shallow Nozzle Type Thermocouples

SHALLOW NOZZLE

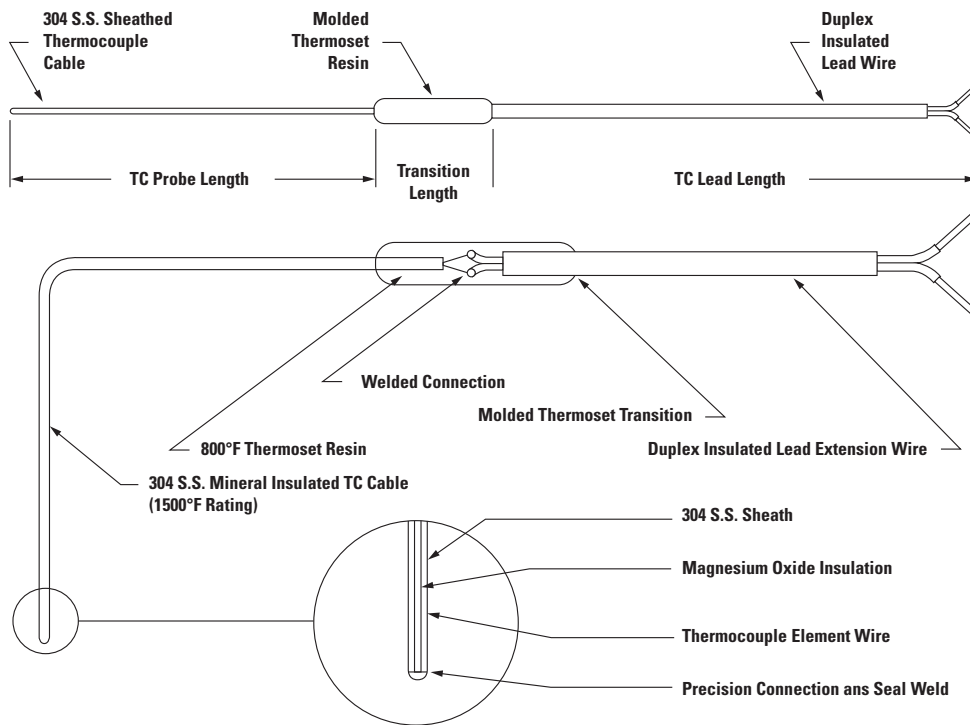

Hi-Temp. Thermocouples

Style "MMT" Miniature Molded Transition

Sensor accuracy and reliability are essential to the precise control of temperatures in multi-component industrial processing systems. Our mineral-insulated style "MMT" thermocouples feature a high-temperature, molded thermoset lead transition. The durable and cost-effective molded transition provides heat and moisture resistance for demanding applications. These high-quality thermocouples are manufactured to stringent specifications and have gained a reputation for unsurpassed performance and reliability. All alloys used in the cable and leads meet or exceed the ANSI specifications for thermocouple grade wire. A full range of lead insulation materials allows selection of leads based on application requirements.

The precision-welded element and lead connections are totally encapsulated in a high-temperature molded thermoset material. If very durable, small diameter thermocouple transitions are required the style "MSMT" thermocouples which are molded into a protective stainless steel cover should be considered. The molded transition provides the highest level of moisture resistance. The standard molded thermoset transition is rated at 800°F. These thermocouples can be readily installed into small diameter thermowells, drilled holes or grooves. When required, tabs, rings and other fastening devices can be induction brazed to the cable to simplify their attachment tool surfaces.

Hi-Temp. Thermocouples

Style "MSMT" Mini SLEEVE Molded Transition

Sensor accuracy and reliability are essential to the precise control of temperatures in multi-component industrial processing systems. Our mineral-insulated style "MSMT" thermocouples feature a metal-sleeved, high-temperature molded thermoset lead transition. The durable and cost-effective molded transition provides maximum strength, heat resistance and moisture resistance for demanding applications. These high-quality thermocouples are manufactured to stringent specifications and have gained a reputation for unsurpassed performance and reliability. All alloys used in the cable and leads meet or exceed the ANSI specifications for thermocouple grade wire. All lead types can be supplied with lead protection for additional abuse resistance. The precision-welded element and lead connections are totally encapsulated in a high-temperature thermoset material molded directly into a protective stainless steel cover.

The metal-sleeved, molded transition provides the highest level of moisture resistance and durability. The standard, metal-sleeved style molded thermoset transition is rated at 800°F. These thermocouples can be readily installed into small diameter thermowells, drilled holes or grooves. Tabs, rings and other fastening devices can be molded in to the transition or attached to the metal sleeve by brazed or welding.

Adjustable Depth - Resistive Temp. Device (RTD)

DME adjustable depth RTDs can be used with thermocouple holes from 1/2" to 10" deep. Standardize on one model RTD for most requirements. Featuring threaded locking cap, which can be rotated or threaded up or down the spring to obtain the desired immersion length.

To install, place probe end in thermocouple hole allowing the tip to rest on the bottom of the hole. Screw bayonet cap down to bayonet adaptor, then back off 2 to 3 turns to provide tension. Push the cap down and twist-lock in place. The spring maintains positive pressure contact between probe tip and thermocouple hole bottom for accurate temperature readings.

Thermocouples

Newbury (Type J)

Newbury OEM-type thermocouples are held in place by means of a set screw which is tapped into the nozzle hex. The thermocouple junction is side sensing and can be inserted from either side of the nozzle. The probe is 1/8" diameter by 1" long with a 90° bend, strain reliever and stainless braid leads.

Thermocouples

Ring Mount

Gasket thermocouples can be quickly and firmly secured to any flat surface with an appropriate sized bolt. Gasket thermocouples are often used in parallel with other types of sensors to create an average temperature measurement between surface and internal temperatures.

Thermocouples

Rigid Probe Thermocouples

Rigid probe thermocouples are useful in a wide variety of solid, gas and liquid temperature applications.

RIGID PROBE

All Thermocouples Listed Below are Type J

Part Number	Probe	Lead Description
RPTC11	1/8" dia. x 1" long	36" stainless steel braid
RPTC14	1/8" dia. x 2" long	72" stainless steel braid
RPTC01	3/16" dia. x 1/2" long	48" stainless steel braid
RPTC02	3/16" dia. x 3" long	48" stainless steel braid
RPTC03	3/16" dia x 3" long	72" stainless steel braid

Insulated Quick Disconnects

“Quick-Slide” male and female fully Insulated Quick Disconnects give reliable connection, and resist corrosion and arcing while improving conductivity. Funnel barrel for easy insertion of wire. Centered male blade allows reversible entry; female connector has corrugated barrel.

- Rated for 300VAC
- 221°F/105°C
- Tab size - .250" x .032"

Stainless Steel Armor

STAINLESS STEEL ARMOR

Use for molding machines, granulators, chillers, general wiring, heater extensions, controller wiring and all types of plant applications. Stainless armor will withstand extremes in heat (1700°F) and abrasion without rusting or crushing.

- Use on heater bands, cartridge heaters, thermocouples, etc.
- Solid stainless steel construction
- Crush-resistant shielding, easy to install
- Rust, corrosion, and vibration resistant

Heater Wire

High Temperature - Type TGGT

HEATER WIRE

600 volt/250°C
 Conductor: flexible stranded, 10% nickel-plated copper
 Tape Wrap: PTFE tape
 Insulation: ceramic tape
 Jacket: PTFE-impregnated glass braid
 Physical Properties: The ceramic tape insulation combines high dielectric strength with excellent flexibility and ease of stripping to achieve a lead wire of superior resistance to high temperature, abrasion, chemicals and moisture.

Contains No Asbestos

Listing: listed by UL (style 5251) and CSA (type C3)
 Nominal Thickness: TFE tape - all sizes .015" (.38mm); ceramic tape -24-8 AWG .010" (.25mm) 6-4/0 AWG .015" (.38mm); glass braid - 2408 AWG .005" (.13mm) 6-2 AWG .0075" (.19mm) 1-4/0 AWG .010" (.25mm)

Best utilized: for internal wiring of heating equipment, wiring and extensions for heating equipment used in plastics processing, heating equipment and industrial cooking equipment.

Hi-Temp Heater Extension Wire 482° Rated (750°F. Intermittent)

Part Number	Size AWG	Strand	Nom. O.D. (In./mm)	Bend Rad. (In./cm)	Ampacity*
TGGT18	18	19 x .010	.114/2.90	.66/1.68	23
TGGT16	16	26 x .010	.124/3.15	.72/1.83	40
TGGT14	14	41 x .010	.140/3.56	1.12/2.84	53

TGGT8	8	168 x .010	.248/6.30	2.30/5.87	115

*Ampacity is based on maximum conductor temperature of 250°C in free air at ambient temperature of 30°C

Heater Wire

HEATER WIRE

600 volt/450°C
 Conductor: flexible, stranded, 27% nickel-clad copper
 Insulation: glass reinforced mica tapes
 Jacket: glass braid impregnated with high-temperature finisher
 Physical Properties: superior resistance to high temperature and the effects of radiation; insulating materials retain their integrity after exposure to 1012

High Temperature - Type MG

Listing: listed by UL (style 5107) CSA - applied for
 Nominal Thickness:
 Insulation Jacket
 22-12 AWG .025" (.64mm); 22-12 AWG .007" (.18mm)
 10-4 AWG .030" (.76mm); 10-4 AWG .015" (.38mm)
 2-4/0 AWG .035" (.89mm) 2-4/0 AWG .020" (.51mm)

Best utilized: for wiring high temperature heating equipment, wiring and extensions for heating equipment used in plastic processing machinery. Well suited for presses and extruders, hot gates etc.

Extreme Temp Heater Extension Wire 868° Rated (1350°F. Intermittent)

Part Number	Size AWG	Strand	Nom. O.D. (In./mm)	Bend Rad. (In./cm)	Ampacity*

KCT600

Fiberglass Sleeving

Special high-temperature "E" Type Fiberglass® developed to provide protection in elevated temperatures that are encountered with molding and extruding applications. E-Glass is non-fray sleeving which is heat treated to remove impurities in the yarn and to retard fraying and splaying. Passes VW-1 flammability requirements. Sleeving may be easily distended to cover terminals and solder connections.

Temperature Ranges:

Continuous service: 500°F (260°C)
Sustained service: 800°F (430°C)
Intermittent use: 1400°F (760°C)

BUTT CONNECTORS

High Temperature Terminal Lugs

Features & Construction

- Wire ranges clearly marked on all terminals
- Load capacity greater than wire itself
- One-piece construction for greater strength & economy
- Full ¼" long shank provides extra length for fast, easy location when crimping, and wide crimping area for permanent vibration-free and moisture-proof connections
- Extra added feature - beveled O.D.

Extreme Temp. Terminal Lugs - 900°F

Part Number	Wire Size	Stud Size

TERMINAL LUGS

Tan/Red Super Wire Connectors

3M®

Features

- One connector replaces three
- Compact size and red miniskirt
- Quick bite spring design
- Comfortable wing design for a better grip
- UL listed, CSA certified & CE
- Temp rating 221°F/105°C
- 600 volts maximum

TRBOX

100 pieces per box

Tan/Red Super Wire Connectors

Ceramic Wire Connectors

- For very high temperature applications
- Usable up to 1740°F/950°C
- Ribbed design for easy use
- 600 volt max.

ECONOMY GLASS TAPE

PVC Electrical Tape

PVC Electrical Tape

Part Number ET750

- 7 mil., 3/4" wide, 60' long
- UL listed
- Individually cello wrapped
- All purpose – all weather
- Service temperature: 176°F/80°C

3M Vinyl Electrical Tape

- 7 mil., 3/4" wide, 66' long
- UL & SA listed
- Stickier, stretchier and highly conformable
- All purpose – all weather
- Operating range up to 20°F/105°C
- Flame-retardant
- Hot and cold weather-resistant
- Use Super 33 + as a primary insulation for wire cable splices up to 600V and for fixture and wire splices up to 1 kV

Meets requirements of ASTM d-3005 Type 1, UL 510, HHI-595C and CSA C22.2

PN # SUPER 33

Features

- 7 mil, 3/4" wide, 66' long
- 9 colors
- UL listed & CSA certified
- All purpose - all weather

35**
1 roll (3/4" x 66')

** To complete part number, add the color of the tape desired from the list to the right (e.g. Red tape would make the part number 35RED)

**Product on

- Color coding, phase identification, marking, wire harnessing
- Temp rating 220°F/105°C

Colors Available

- RED
- GREEN
- BROWN
- WHITE
- YELLOW
- GRAY
- ORANGE
- VIOLET

3M Electrical Tape Multi-Pack

Features

- 5 colors in one pack: blue, green, red, white & yellow
- Color coding, phase identification, marking, wire harnessing

PN: 35 Multipack
5 rolls (1/2" x 20')

available

- 7 mil - 1/2" wide x 20' long
- UL listed & CSA certified
- All purpose - all weather
- Temp rating 220°F/105°C

3M Hi-Heat Electrical Tapes

3M Hi-Heat Electrical Tapes are ideal for use on heater bands and thermocouple lead extensions as well as all high-heat applications. We offer two temperature ratings and mill thicknesses. Both are thermosetting and pressure sensitive for a long service life.

27 Glass Cloth Electrical Tape

- Operates at 130°C (266°F)
- 7 mil thickness
- UL recognized component listing for 150°C (guide OANZ2, file E17385). CSA accepted component 130°C file LR93411. Meets MIL-I-15126F type GFT

Part Number	Width	Rated Temp Range	Thickness
27-500	1/2"	266°F/130°C	7 Mil
27-750	3/4"	266°F/130°C	7 Mil
69-500	1/2"	356°F/180°C	7.5 Mil
69-750	3/4"	356°F/180°C	7.5 Mil

69 Glass Cloth Electrical Tape

- Operates at 180°C (356°F)
- 7.5 mil thickness
- Meets requirements of MIL-I-19166C and has UL recognized component listing for 200°C (guide OANZ2, file E17385). CSA accepted component 180°C file LR93411

GPMS Solid State Relays

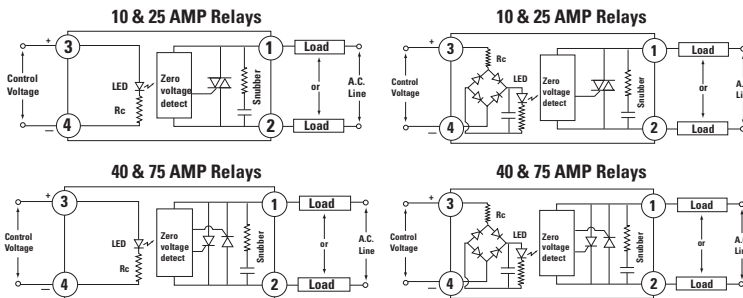

Applications for Solid State Relays are typically used to operate devices such as motors, heaters and lights from low-power signals such as those generated by computers, microprocessors and other logic systems. Here are some examples: heating controls, P.C. drilling machines, industrial process controls, electrostatic precipitators, electromagnets, assembly equipment, plastics thermoforming, welding controls, artificial vision systems, fire and alarm systems, production equipment, lubrication systems, industrial fans and blowers, utility control systems.

Long life reliability when properly used, the Solid State Relay (SSR) provides a high degree of reliability, long life and reduced Electro-Magnetic Interference(EMI), together with fast response and high vibration resistance. No moving parts; the absence of moving parts means that there is nothing to "wear out." Fast switching Solid State Relays can switch up to 80 times per second, much faster than any electro-mechanical relays low input power required SSR's allows the switching of high loads via ultra-sensitive input power. A low level logic signal (TTL) can activate a switch for as much as 100 AMPS. Resistant to shock and vibration, our solid state relays are filled with an epoxy compound. When cured, the epoxy hardens so that the finished relay is a solid block. This prevents damage to the unit by the shock or vibration present in many industrial usages. Quiet operation, completely quiet switching. Beneficial in many areas where quiet operations are desirable.

- Optically isolated
- Built-in snubber
- 4000 volt isolation
- Zero voltage turn-on
- Direct copper bonded SCR's
- High surge capability
- 100% tested at rated current
- UL recognized
- CSA certified
- CE compliance
- 600 volt peak blocking voltage (1200 volt peak blocking voltage)*
- LED status indicator*
- Clear safety cover included*

* Features available on the 660 volt AC output models only

30 AMP Contactors

Quantum IM Mounts

CONTACTORS

Double Pole

Part Number	Voltage	Wattage	Volt AMPS
CMC30-24DC2	24 VDC	6.3	6.3
CMC30-24AC2	24V-50/60Hz	4.9	13.9
CMC30-1202	120V-50/60Hz	4.9	13.8
CMC30-2402	220V-50/60Hz	4.4	11.7

Triple Pole

Part Number	Voltage	Wattage	Volt AMPS
CMC30-24DC3	24 VDC	5.2	5.2
CMC30-24AC3	24V-50/60Hz	5.0	19.6
CMC30-1203	120V-50/60Hz	4.2	16.8
CMC30-2403	220V-50/60Hz	3.9	14.5

- Contact resistance
- Dielectric withstand 2,500 VAC RMS min
- Operation time: 50 mille second
- Release time: 70 mille second
- 30 AMP @ 600 RES rating per pole
- PTFE plunger guides
- UL listing CSA certified
- Coil terminals - #6 screw
- Load terminals - #8 screw

Voltage Sensor

With Both Visual and Audible Alarm!

- Detects 50–1000 volts AC
- CAT3 & CAT4 rated
- Detects defective grounds
- No switch required - always ready to go!
- Buzzer will only react to an AC field - NOT static electricity
- Safety instrument - locates defective grounds, breaks in wires, energized circuits, blown fuses, etc.
- Non-conductive surfaces
- Personal verification - lockout/tagout procedures

Part Number VP200

VOLTAGE SENSOR

Current Ring Indicators

Current Rings are totally self-contained devices for detecting current flow. These devices provide a safe, economical way of indicating the presence of an absence of electrical current flow. The indicator is attached directly to a current-carrying wire. When the current exceeds the turn-on point, the LED will illuminate to indicate the presence of current.

Applications

- Monitor status of heater element
- Observe remote loads
- Indicate phase loss
- Monitor motor operation

Features

- Self-powered
- Red or green indicator
- Easy to install
- Supplied with plastic tie
- Bright yellow case for easy I.D.
- Panel-mounting bracket available

Specifications

Min. turn-on point:
 2 AMPS for CR-45-R
 2.5 AMPS for CR-45-G
 Indicating Range:
 2 to 100 AMPS (for CR-45-R)
 2.5 to 100 AMPS (for CR-45-G)
 Max. Continuous Current:
 100 AMPS

LED Type: T1 3/4 diffused
 LED Color: Red or green
 Case Material: Thermoplastic
 Case Color: Bright safety yellow
 Weight: .5 oz.
 Frequency: 50 – 60 Hz
 Mounting Bracket Material:
 Non-magnetic aluminum

Wire Passes	Turn-On Point		Max. Wire Diameter
	Red	Green	
1	2	2.5	.29
2	1	1.25	.14
3	.66	.83	.13
4	.5	.62	.12
N	2, N	2.5, N	

CURRENT RING INDICATORS

Part Number	Description
CR45R	Current Ring - Red
CR45G	Current Ring - Green
CR19	Current Transformer
CR25	Press-In Indicator
MB45	Mounting Bracket

Sound Level Meters

Analog & Digital Sound Level Meters

Check Noise Levels Economically

Features

- Tripod mount ideal for field use
- Analog output for connection to chart recorders, data loggers, etc.
- Selectable weighting ('A' or 'C') and response time (Fast or Slow)
- MAX HOLD front-panel select switch locks highest reading on the display
- Complete with battery

Applications

- Identify noise ordinance violations, traffic noise measurements, community noise measurements, theater acoustic studies, stereo balancing.

Specifications

	407706 Analog SLM	407730 Digital SLM
Range:	54 to 126 dB	40 to 130 dB
Accuracy:	± 3dB @ 94 dB,1000Hz	± 2dB @ 94 dB,1000Hz
Weighting:	'A' and 'C' (Selectable)	'A' and 'C' (Selectable)
Response time:	FAST and SLOW (Selectable)	FAST and SLOW
(Selectable)		
Microphone:	0.5 Electret Condenser Type	0.5 Electret Condenser Type
Analog output:	AC: 0.707 Vrms	AC: 0.707 Vrms
Power supply:	Heavy duty, 9V Battery	(4) AAA batteries
Dimensions:	2.7 x 7.1 x 1.4 (68 x 180 x 36mm)	2.2 x 9 x 1.7 (57 x 230 x 44mm)
Weight:	5.1 oz. (145g)	5.6 oz. (160g)

Digital Sound Level Meter

- Analog bargraph with 50 dB range updates every 40ms
- ± 2dB accuracy with 0.1 dB resolution
- AC analog output
- Complete with microphone wind-screen and four AAA batteries

Digital Sound Level Meter

Part Number 407730

Economical True RMS Multimeter with 11 functions

Features

- Advanced measurements include capacitance, frequency, and duty cycle
- Relative function for establishing a base line reference
- Easy-to-read large 4000 count backlit display
- True RMS AC measurements
- Type K thermometer built-in for surface or air temperature measurements
- Input fuse protection and mis-connection warnings with audible and visible signals
- Auto power off saves battery life
- Data hold freezes current display reading
- Ergonomically designed to fit comfortably in hand
- Protective holster with test lead holder
- Complete with CAT III test leads, multi-position tilt stand, hanging strap, holster with built-in test lead storage, bead wire temperature probe, and 9V battery

Specifications	Range
Basic Accuracy	$\pm 0.3\%$ (VDC)
AC/DC Voltage	0.1mV to 600V (DC/AC)
AC/DC Current	0.1 μ A to 20A
Resistance (Ω)	0.1 Ω to 40M Ω
Capacitance	0.01nF to 100 μ F
Frequency	0.001Hz to 10MHz
Temperature	-4 to 1382°F (-20 to 750°C)
Diode/Continuity	0.1 to 99.9%
Dimensions/Weight	7.4 x 3.2 x 2" (187 x 81 x 50mm)/0.75 lbs (342g)

Part Number:EX430

1000A Clamp Meters

With IR Thermometer

Features

- Autoranging with manual range override
- Data hold, min./max, and auto power off
- Peak hold for inrush currents
- Dimensions: 10.6 x 4.3 x 2, weight 13.6 oz
- AC/DC voltage, resistance, capacitance and frequency
- Complete with test leads, 9V battery and belt holster

Specifications

Display Counts	4000 count backlit LCD
Basic Accuracy	±3% rdg (AC)
AC/DC Volt (max res)	600V (0.1mV)
Resistance (max res)	40MΩ (0.1Ω)
Capacitance (max res)	40mF (0.001nF)

Specifications

Frequency (max res)	4kHz (1Hz)
IR Temp	-58 to 518°F
	-50 to 270°C
Temp. Type K	-4 to 1832°F
(only on EX820)	-20 to 1000°C

Part Number EX810 (average responding)

Part Number EX820 (True RMS and Type K thermocouple temp. probe)
